[Advanced Physics Unit 6 Worksheet 3 Forces Answers.rar](#)

**The PMRT – a tool to facilitate...**

- The review group to coming to a clear understanding of the cause of death (accepting that this may not always be possible even when full clinical investigations have been undertaken) to support:
  - Learning to prevent future similar deaths – into an action plan
  - Discussion with the parents about what happened and why – this is particularly important for future pregnancy planning
- Generation of a report for each individual death – a version to share with parents (in development)
- Trust/Health Board level and 'regional' level reporting to support wider organisational learning (in development)
- National benchmarking and learning through publication of annual reports (in 2019)

**How the PMRT works....**

- Web-based tool, wholly integrated within the national MBRACE-UK perinatal mortality surveillance data collection system – **the tool is NOT data collection**
- The tool presents a series of questions about the care provided for the local perinatal mortality review group to consider
- Structured, detailed series of questions from pre-conception through to bereavement and follow-up care – **asks the review group to assess the quality of care provided – 'judgement'**
- PMRT provides notes of relevant national (NICE, SIGN, RCOG etc.) guidance to assess care against – in the form of 'tool tips'

**Review Process**

Quick Review → Explore Issues → Input data → PMRT Review → Finalise PMRT

- Quick Review**
  - Within 72hrs
  - Identify immediate concerns
  - Escalate to SI if needed
  - Rapid notification
  - Enter basic details to open case to PMRT
- Pre-meeting:** gather information (statements, US reviews as needed) & parent concerns/questions
- Input factual data into PMRT**
- PMRT Review**
  - Within 4 – 8 weeks
- Generate report**  
Feedback to parents
- Ensure action points are implemented and followed up by governance team appropriate to your directorate**
- Consider re-review after post-mortem or delay closure if key information missing**

Case can be revisited via the tool at any time throughout this process

**We recommend....**

- Reviews should be undertaken by a perinatal mortality review group – not individuals or even pairs of individuals
- The perinatal mortality review group should be multidisciplinary – we provide advice on membership and terms of reference for the group
- Sufficient time is set aside for this work**
- External input into the perinatal mortality review group to allow for a 'fresh eyes' perspective on both the individual care and the organisation of care
- Links with the hospital governance team are essential to ensure implementation of actions and to assess the effectiveness of changes and interventions
